Host.

Quanta System **Quanta System**

Description.

Quanta System is an Italian company that has been delivering innovative laser systems for Surgery, Aesthetics, and Art Conservation since 1985. With over 30,000 lasers installed in 150 countries, the company is committed to improving people's quality of life through cutting edge technology, continuous research, and a forward looking mindset.

Guided by the belief that there is always a way to make life better, Quanta System drives progress every day by combining innovation, creativity, and a strong "Made in Italy" heritage.

During this visit, participants will explore the history and product portfolio of Quanta System, engaging directly with the company's professionals, experts in laser technology, to gain insight into the processes that drive high precision and high quality technological development.

The experience will include guided tours of the company and its laboratories, where participants can observe technological processes and production activities, followed by a networking session with Quanta System experts. This immersive afternoon aims to provide a concrete overview of who we are and of the potential future career paths in the world of lasers for health and beauty.
